# How to obtain the ICS update for the GT-I9100

**Q. Can I upgrade my phone to Android SW version “Ice Cream Sandwich” (ICS) via FOTA?**

- A. The ICS SW upgrade is **not currently** supported via FOTA.  
When the ICS upgrade becomes available to upgrade your GT-I9100 to ICS version, please upgrade your mobile via **KIES 2.0**

A. The Ice cream Sandwich OS feature does not support **Bluetooth 3.0 HS** (High Speed) function

However **Bluetooth 3.0** is supported.

If you want to transfer a file at a faster data rate between devices, you can use Wi-Fi direct function. (where the other device supports this function)

**Q. Can I see Adobe flash contents in web browser?**

A. **No** - To view compatible Adobe Flash contents of a web page, please download Flash player from Android “Play Shop” (Previously known as Android market).

# Observations regarding the update 2/3

**Q. I use the exchange server account in my mobile and can not upgrade its OS to ICS through Kies.**

**A.** Some exchange server account requires the “device encryption” to connect to exchange server.

“Device encryption” limits the synchronization or firmware updating through Kies.

Hesiod revisits the story of Prometheus in the *Works and Days* (lines 42–105). Here, the poet expands upon Zeus's reaction to the theft of fire. Not only does Zeus withhold fire from men, but "the means of life," as well (42). Had Prometheus not provoked Zeus's wrath (44–47), "you would easily do work enough in a day to supply you for a full year even without working; soon would you put away your rudder over the smoke, and the fields worked by ox and sturdy mule would run to waste." Hesiod also expands upon the *Theogony's* story of the first woman, now explicitly called Pandora ("all gifts"). After Prometheus' theft of fire, Zeus sent Pandora in retaliation.
